JOURNAL OF CELLULAR AND COMPARATIVE PHYSIOLOGY

Board of Editors

ARTHUR K. PARPART, Managing Editor
Princeton University

W. R. AMBERSON
University of Maryland

H. F. BLUM
National Cancer Institute

F. BRINK
The Rockefeller Institute

D. W. BRONK
The Rockefeller Institute

L. B. FLEXNER
University of Pennsylvania

E. N. HARVEY
Princeton University

M. H. JACOBS
University of Pennsylvania

D. MARSLAND
New York University

D. MAZIA
University of California

VOLUME 52

AUGUST, OCTOBER, DECEMBER

CONTENTS

No. 1 AUGUST 1958

RICHARD L. SCHULTZ AND ROLAND K. MEYER. Cytochemical characterization of the granules in zona glomerulosa of the bovine adrenal gland 1

IRWIN R. KONIGSBERG. Thyroid regulation of protein and nucleic acid accumulation in developing skeletal muscle of the chick embryo. Ten figures 13

J. G. ALDOUS AND K. R. ROZEE. The metabolic characteristics of yeast cells treated with fluoroacetic acid: evidence of the regulation of glucose oxidation by pH 43

D. E. S. BROWN, K. F. GUTHE, H. C. LAWLER AND M. P. CARPENTER The pressure, temperature and ion relations of myosin ATP-ase. Five figures 59

KARL F. GUTHE AND DUGALD E. S. BROWN. Reversible denaturation in the myosin adenosine triphosphatase system. One figure 79

JULIAN M. TOBIAS. Experimentally altered structure related to function in the lobster axon with an extrapolation to molecular mechanisms in excitation. Twenty-nine figures .. 89

PHILLIP G. NELSON. Effects of certain enzymes on node of Ranvier excitability with observations on submicroscopic structure. Six figures 127

PAUL R. GROSS AND WILLIAM PEARL. Sedimentability of microsomal nucleoprotein from rat liver homogenates in ionic media. I. Precipitation of pentose nucleoprotein by $CaCl_2$. Five figures 147

A. K. BRUCE AND J. N. STANNARD. The effect of temperature on potassium transfer in irradiated yeast. Four figures 165

H. F. BLUM, E. G. BUTLER AND S. E. SCHMIDT. Regeneration of limb abnormalities after ultraviolet irradiation. Five figures 177

SOCIETY OF GENERAL PHYSIOLOGISTS. Thirteenth Annual Meeting, Marine Biological Laboratory, Woods Hole, Massachusetts, June 9, 10 and 11, 1958 187

No. 2 OCTOBER 1958

HSIEN-CHOH SIE, JOSEPH JIN CHANG, AND FRANK H. JOHNSON. Pressure-temperature-inhibitor relations in the luminescence of *Chaetopterus variopedatus* and its luminescent secretion. Eighteen figures 195

PHILIP GRANT. The synthesis of deoxyribonucleic acid during early embryonic development of *Rana pipiens*. Three figures 227

PHILIP GRANT. The incorporation of P^{32} and glycine-2-C^{14} into nucleic acids during early embryonic development of *Rana pipiens*. One figure 249

HENRY I. HIRSHFIELD, ARTHUR M. ZIMMERMAN AND DOUGLAS MARSLAND. The nucleus in relation to plasmagel structure in *Amoeba proteus*; a pressure-temperature analysis. One figure 269

E. R. WHITCOMB, S. L. FRIESS AND J. W. MOORE. Action of certain anticholinesterases on the spike potential of the desheathed sciatic nerve of the bullfrog. Eleven figures 275

DOUGLAS G. HUMM AND JANE H. HUMM. A comparison of the activity of normal and atypical pigment cells from swordtails, platyfish and their hybrids against certain melanin precursors. One figure 301

KENNETH E. HUTTON. The blood chemistry of terrestrial and aquatic snakes 319

L. LEVENBOOK WITH THE TECHNICAL ASSISTANCE OF JEANNE KUHN. Intracellular water of larval tissues of the Southern Armyworm as determined by the use of C^{14}-carboxyl-inulin. One figure 329

CLYDE MANWELL. The oxygen-respiratory pigment equilibrium of the hemocyanin and myoglobin of the amphineuran mollusc *Cryptochiton stelleri*. Two figures 341

No. 3 DECEMBER 1958

RICHARD S. YOUNG, LEON HURWITZ AND EDWIN I. GOLDENTHAL The effect of Chlorambucil (CB 1348) on growth and metabolism. Five figures 353

R. Cohen and M. Delbrück. Distribution of stretch and twist along the growing zone of the sporangiophore of Phycomyces and the distribution of response to a periodic illumination program. Ten figures 361

Anna Ghiretti-Magaldi, A. Giuditta and F. Ghiretti. Pathways of terminal respiration in marine Invertebrates. I. The respiratory system in Cephalopods. Ten figures 389

Joseph Frankel and Howard A. Schneiderman. The effects of nitrogen, helium, argon and sulfur hexafluoride on the development of insects. Four figures 431

F. H. McCutcheon. Swimbladder volume, buoyancy, and behavior in the pinfish, *Lagodon rhomboides* (Linn.). Two figures 453

Norman E. Kemp, Margaret D. Allen, Marjorie A. M. Smith and Paul K. Berg. Morphogenesis and metabolism of amphibian larvae after excision of heart. III. Effect of sodium azide on respiratory metabolism of heartless larvae of *Rana pipiens*. Four figures 481

Helen B. Burch, Oliver H. Lowry, Taisija De Gubareff and Stephen R. Lowry. Flavin enzymes in liver and kidney of rats from birth to weaning. Two figures 503

SUPPLEMENT 1 DECEMBER 1958

Symposium on Genetic Approaches to Somatic Cell Variation

Alexander Hollaender — Introduction xi

Curt Stern. The nucleus and somatic cell variation 1

Boris Ephrussi. The cytoplasm and somatic cell variation 35

Albert H. Coons. The cytology of antibody formation. Two figures 55

C. W. Cotterman. Erythrocyte antigen mosaicism 69

K. C. Atwood and S. L. Scheinberg. Somatic variation in human erythrocyte antigens. Three figures 97

George Klein and Eva Klein. Histocompatibility changes in tumors. One figure 125

R. Alexander Brink. Mutable loci and development of the organism. One figure 169

Theodore S. Hauschka. Correlation of chromosomal and physiologic changes in tumors. Seven figures 197

C. E. Ford, J. L. Hamerton, and R. H. Mole. Chromosomal changes in primary and transplanted reticular neoplasms of the mouse. Two figures 235

Marguerite Vogt. A genetic change in a tissue culture line of neoplastic cells. Four figures 271

Theodore T. Puck. Growth and genetics of somatic mammalian cells *in vitro*. Seven figures 287

General discussion: Molecular basis of the cause and expression of somatic cell variation. One figure 313

Chairman, E. L. Tatum: Michael Heidelberger, Rollin D. Hotchkiss, W. Eugene Knox, Daniel Mazia, G. D. Novelli, and Sol Spiegelman

Werner Braun. Cell population dynamics and somatic change. Three figures 337

Claudio Barigozzi. Melanotic tumors in *Drosophila*. Three figures 371

Joshua Lederberg. Genetic approaches to somatic cell variation: Summary comment 383
